WOUND CARE BILLING

How is your practice doing with collections?

For our Wound Care practices 90.5% insurance payments are within 30 days and 97.6% within 60 days of the date patient was seen.

Billing for Wound Care Practices Nationwide from CA to MA

Credentialing Services

Get to us for credentialing. Starting new practice, moving, adding providers or accepting new insurances? We will do credentialing fast and do it right.

There is no substitute for experience. As a Wound Care specialist you know that. Wound care billing requires specialized coding and billing knowledge, correct credentialing and experience dealing with multiple place of services and different billing situations. We have done credentialing and currently do coding and billing for several wound care specialties.

We begin with a review of Fee Schedule to make sure it's up to date. Often we find certain codes where if bill rate is adjusted higher, insurance will reimburse.

There are certain wound care procedures which also have Add-On codes & needs to be billed along with the main procedure if the wound region is more than the standardized unit.

Only identifying the Procedure code is not sufficient, wound care biller should know how the code has to be billed & at what particular frequency. We know how exactly it has to be billed in wound care billing, to get optimized reimbursement.
